BETHELHEM TEKA

ADDIS ABABA, ETHIOPIA

+251911306383 bethelhemonline@gmail.com

Dedicated Data Engineer with a passion for leveraging data to tell compelling stories. Backed by a strong educational foundation and over eight years of experience, I excel in all aspects of data pipelining, including data collection, organization, analysis, interpretation, and dissemination. Skilled in developing innovative data visualizations and continuously optimizing processes to maximize the strategic value of data. Adept at delivering timely and well-structured data insights to both internal and external stakeholders. Proven expertise in database management, crafting efficient queries, developing data cleansing workflows, and utilizing business intelligence (BI) tools to generate insightful reports that drive informed decision-making.

SKILL

- Expertise with SQL Scripts
- Worked with PowerBI, Tableau, Google Studio, QuickSight, BigQuery, SQL Server, Postgres, and SSIS without difficulty.
- Worked on narrative dashboards after ingesting data.
- The creation of web applications using JavaScript and.Net
- AWS Cloud Practitioner

Professional Work Experience

Technical Advisor II, Digital Data Management: 2019 - Now
Catholic Relief Services (CRS – Ethiopia Program)

- Pull data from various online and offline data sources into staging database and setup automatic incremental refreshing scheme.
- Design data cleaning protocol and apply in data cleaning packages.
- Design and implement ETL (Extract Transform and Load) packages for data cleaning, flagging, and transforming on recommended tools including SQL Server Integration Services (SSIS) or Pentaho Data Integration (PDI).
- Analyze project data and design complex queries to extract data per project reporting demand.
- Design reports and dashboards to support management decision making and adaptive learnings.
- Lead data reconciliation meetings with project stakeholders to ensure all data is on expected level of quality and quantity.
- Design and implement innovative ICT4D solutions including web application
- Support capacity building efforts in utilization of ICT4D tools and reports.

Data Engineer: 2019 –2024
Input Output Global

- Data Ingestion: Pulling data from various platforms and databases
- Data Cleaning and Triangulation: Data validation and reconciliation to ensure accuracy.
- Data analysis and visualization: creating interactive dashboards for internal and external stakeholders
- Designing database queries: Prepare advanced SQL scripts to extract Cardano blockchain data for various purposes

Professional Work Experience

ICT Officer: 2017– 2019
Catholic Relief Services (CRS – Ethiopia Program)

- ・ Identify operational gaps and plan for IT solutions.
- ・ Design and implement proposed solutions.
- ・ Secure hosting environment for web solution deployment.
- ・ Organize and conduct system user training when there is a need.
- ・ Work on source code patching over deployed IT solutions for
- corrective maintenance.
- ・ Manage backup and recovery of deployment cloud environments.

Senior Software Engineer: April 2011 – May 2017
Cybersoft Software Company

- Develop ERP modules and databases for customized client need
- Determine operational feasibility via problem definition, requirements analysis, and development
- System modeling
- Facilitate client training on developed ERP solutions

Lecturer: January 2010 – 2017
Addis Ababa University

- Carrying out teaching, demonstrations, and project supervision at undergraduate classes.
- Supervising research students,
- Engaging in original research in the field of computer science or related area
- Securing research funding and engage in the management of research projects
- Engaging in knowledge transfer activities specifically in University-Industry-Linkage project.

Education

- **Master's degree in computer science**
  Addis Ababa University, 2007 – 2009
- **Master's degree in business administration**
  Universitas Cattolica del Sacro Cuore, 2019-2020
- **Bachelor's degree in computer**
  science Addis Ababa University,
  2001 – 2005
